

**Case Management
provides expert
support when you
need it most.**

Available at no cost to you as part of your health benefits!

Case Management is a **confidential** program that is available to support you in the event of a serious health complication, like an illness or injury. Case managers are specially trained registered nurses and licensed social workers who will work with your family, your doctor and your hospital to make sure you get the care you need. Your case manager can help you understand your treatment plan and options for your care, and answer any questions you have along your path to recovery.

There are multiple ways for you to become involved in Case Management. We may reach out to you because you were identified as appropriate for Case Management. In addition, you, a family member or a provider can call to

determine if you would benefit from the program.

When you enroll in Case Management, you will speak with a dedicated case manager over the phone on a regular basis. Your case manager will answer any questions you may have and will work with your providers to help ensure that you get high quality, cost-effective care.
